

BURNED BY TOBACCO:

SAVED BY OATS
DENVER—Jack Daly fell asleep with a cigaret in his fingers. John Oats, his roommate, returned to find the room filled with smoke. Dragged Daly out. City hospital physicians think he'll recover.

SPANKS BABY WITH

AX HANDLE; JAIL
MEMPHIS—Because she spanked her baby with an ax handle, Mary Johnson, negress, is in jail here.

The average annual petroleum production of Burma is nearly 300,000,000 gallons.

No more of this hot-weather drudgery for you.

If hubby had to do the washing these hot summer days your home would boast of a power washing machine.

In his office, at his work bench or elsewhere your husband has electricity to do the hard work for him yet you continue to wash your clothes as the women did in Egypt—4,000 years B. C.

APEX ELECTRIC WASHER

In the Apex Electric Washer we offer a thoroughly successful power washer. In our opinion the best to be had.

The power plant is one of those splendid Robbins & Meyers motors, conceded to be as good a motor as there is to be had.

The washer operates on the oscillating principle throwing the clothes from side to side over the "Apex" in the center of the container.

The wringer is the swinging type, adjustable to any position, has 11-inch rollers, which revolve at slow speed. All gears are enclosed.

We have adopted the "Apex" only after very careful investigation.

When you buy of Dorris-Heyman you buy no experiments. Thirty-five years of successful house furnishing experience are your assurance.

NO WATER FLOWING OVER SPILLWAY AT BIG DAM SINCE JUNE 3

The power system of the Salt River Valley Water Users' association, for the month of June, generated 7,213,810 kilowatts, according to the monthly report of the association. The Roosevelt power plant operated continuously during the month and water ceased flowing over the spillways of the dam June 3. The Crosscut power plant also operated continuously during the month. The South Consolidated plant operated 99 per cent, the Arizona Falls plant, 99 per cent, and the Chandler power plant 97.2 per cent.

All pumping plants were available for use when needed with the exception of Cleman's plant and pumping plant 27E OS. A new runner and shaft was installed at Cleman's plant and the pole top oil switch was repaired at pumping plant 27E OS.

The construction crew at Roosevelt was engaged during the month on road repairs, cleaning up of debris in the river below the dam, repairing equipment, installing a ventilator in the roof of the power house and much work was done on camp maintenance. Water was run in all of the canals during the month, the demand for irrigating water being very heavy during the latter half.

There were six maintenance crews at work in the field and the following statement shows the average number of men and stock employed and the results attained:

Average number of men, 379.
Average head of stock, 101.
Miles main canals cleaned, 75.
Miles laterals cleaned, 125.
Number of new structures installed, 19.
Number of old structures repaired, 209.

Riprap placed, 950 feet.
Concrete placed, 23 cubic yards.
Dirt fill placed, 3,874 cubic yards.
Concrete pipe laid, 472 feet.
Corrugated pipe laid, 96 feet.

The protective work being done on the bank of the Arizona canal 2,000 feet below Granite Reef dam was completed and the crew moved to the Indian Bend waste way to make repairs on the banks which were washed out during the floods last year.

The Ruth excavator removed berm and moss from the Highline canal south of the division gates for a distance of three and one-fourth miles and moved approximately 5,500 cubic yards from both banks. This machine will be engaged during July in similar work north of the division gates.

The P. and H. dragline worked on widening the Eastern canal during the first half of the month, after which it was moved to the Western canal to remove an accumulation of silt which seriously affected the operation of the canal.

The following acreages were entitled to water service on the first of the month:

Class	Acreage
Permanent	171,888.75
Normal flow	2,109.75
Temporary	18,972.26
Townsites	3,973.75
Total	196,944.51

OBITUARIES

Mrs. Jessie M. Clark

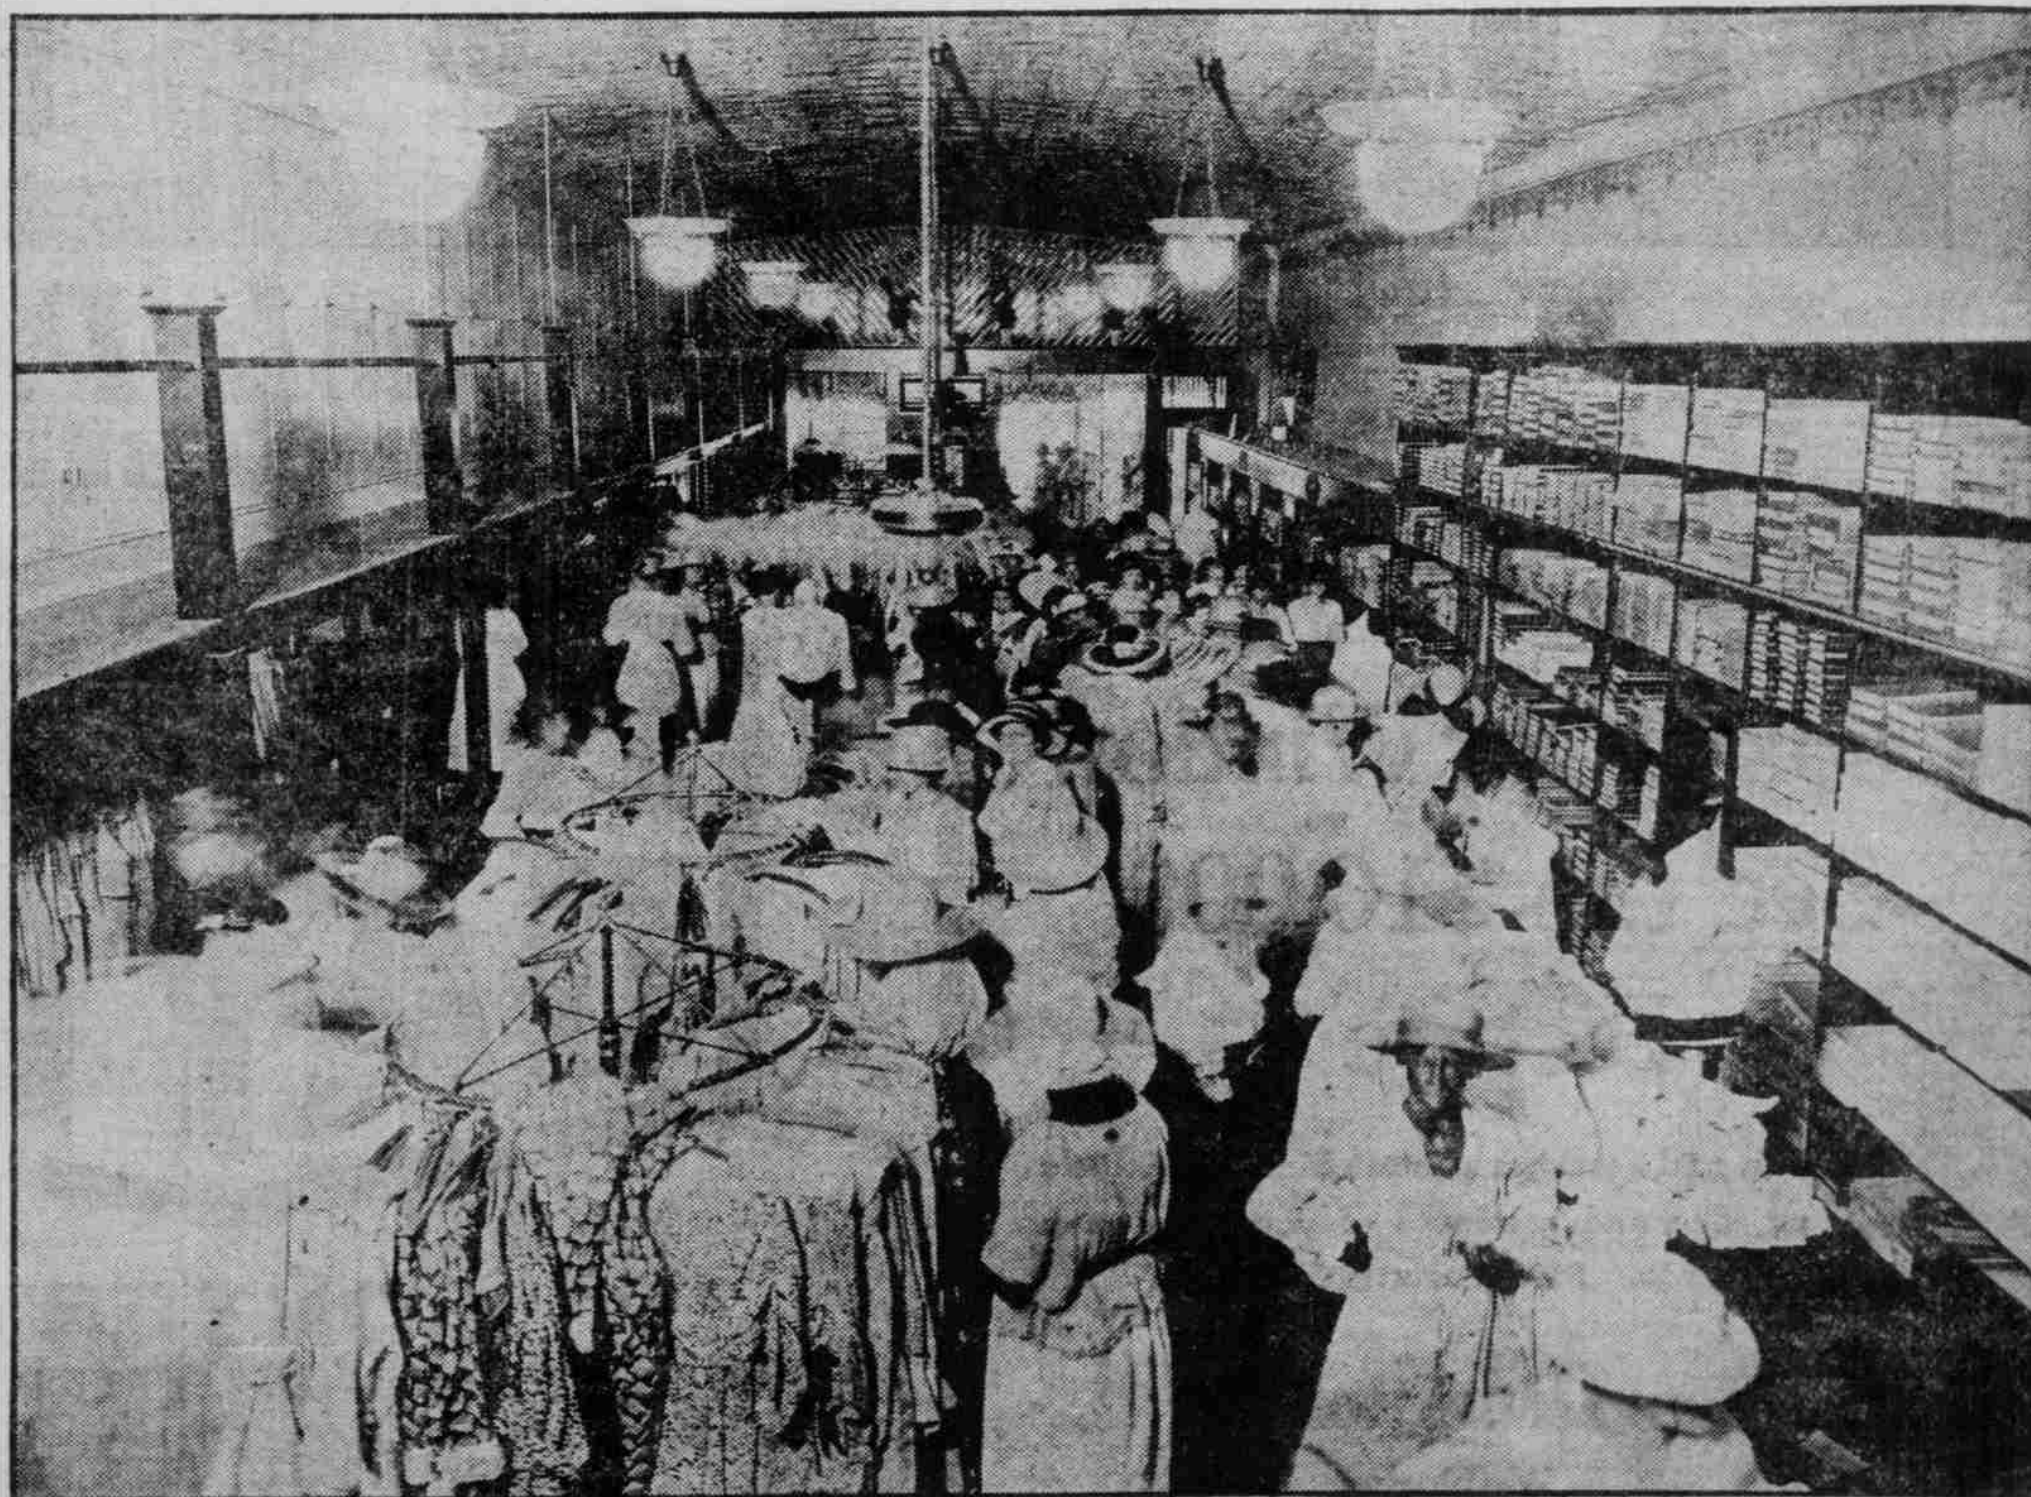

Funeral services were conducted yesterday at the George F. Merryman chapel for Mrs. Jessie M. Clark, better known to many Phoenix friends as Mrs. Jessie M. McIntyre, formerly a nurse at St. Joseph's hospital. Mrs. Clark came here from Scotland 13 years ago and had resided in this city for the past seven years.

The Rev. Dr. Odell of the First Presbyterian church, conducted the beautiful service at the chapel and again at the graveside. There was a large attendance of friends at the cemetery.

Mrs. Clark, who was 54 years old, leaves to mourn her, her husband, F. G. Clark, and a son and daughter, Angus and Jean McIntyre, who arrived here from Scotland only seven weeks ago and were with their mother to the end.

The family desires to express sincere thanks for the many beautiful floral tributes expressive of sympathy which were received.

An actual scene taken last Thursday afternoon at the French Shop. Hundreds of women have taken advantage of the wonderful values that have been offered between the hours of 2 and 5 o'clock. On account of the wonderful bargains offered every Thursday afternoon at the French Shop we now find that Thursday afternoon is the greatest shopping period of the entire week.

AT THE FRENCH SHOP
